**31 January
2016**

Call for papers

Special issue featuring invited papers from the 20th Workshop on MHD Stability Control, addressing non-linear phenomena and MHD control for ITER and beyond, 22–24 November 2015

Your invitation to submit

Plasma Physics and Controlled Fusion[™] (PPCF) is delighted to announce that it will be publishing a selection of papers from the 20th Workshop on MHD Stability Control, to be published in mid-2016. Invited and contributed speakers are encouraged to submit.

Regular research papers in PPCF can be 4–14 pages in length (at approximately 600 words per page), including space for figures, graphs and tables (figures are equivalent to about 150 words each). The special issue will be published as a part issue of the journal and each corresponding author will receive a complimentary copy. We encourage colour figures and multimedia clips for the online version of the special issue, for which there is no charge. As with our regular submissions, there will be no page charges.

You are invited to submit your article by 31 January 2016.

Submissions received after this date will be considered for the journal but may not be included in the special issue.

All submitted articles must fit within the scope of PPCF and will be fully refereed to the journal's usual high standards. The issue will be widely promoted to the plasma-physics community, ensuring that your work receives maximum visibility. As a matter of exception, the special issue will be available free of charge on the journal website for the first 90 days of publication to increase the readership and impact of the issue.

Guest Editor

- **Dr Jong-Kyu Park**, Princeton Plasma Physics Laboratory, USA

How to submit your paper

- Use our submission facility at iop.org/journals/authorsubs
- E-mail files as attachments to ppcf@iop.org. All submissions should be clearly marked MHD Stability Control Workshop 2015.

Detailed information about how to submit an article for publication in the journal can be found on our website, at iop.org/journals/authorsubs.

About PPCF

Published every month, PPCF covers all aspects of the physics of hot, highly ionized plasmas. This includes results of current experimental and theoretical research on all aspects of the physics of high-temperature plasmas and of controlled nuclear fusion, including the basic phenomena in highly ionized gases in the laboratory, in the ionosphere and in space, in magnetic-confinement and inertial-confinement fusion, as well as related diagnostic methods.

Further information

For further information, or to request a free sample of the journal, visit iopscience.org/ppcf or e-mail the publishing team at ppcf@iop.org.
