**San Diego Science Alliance Education Outreach**

**Activities**<sup>1</sup> ANNE P. BLUE, *General Atomics* — The General Atomics Science Education Outreach Activities as well as those of several other San Diego area institutions led to the formation in 1994 of the San Diego Science Alliance. The Science Alliance is a consortium of science-related industries, institutions of research and higher education, museums, medical health networks, and science competitions in support of K-12 science education. Some Alliance accomplishments include printing over 4000 resource catalogs for teachers, workshops presented by over 20 of their business members at the San Diego Science Education Conference, and hosting of 3 eight-week courses for teachers. The Alliance provides an important forum for interaction between schools and teachers and local industries and institutions. The Science Alliance maintains a World Wide Web Home Page at [http://www.cerf.net/sd\\_science/](http://www.cerf.net/sd_science/). General Atomics' role in the San Diego Science Alliance will be presented.<sup>2</sup>

<sup>1</sup>Work partially supported by General Atomics Sciences Education Foundation.

<sup>2</sup>Presented by Patricia S. Winter for the General Atomics Science Education Groups and San Diego Science Alliance.
