

ABSTRACT

This draft three year program plan presents a concise view of the research planned on the DIII-D tokamak in the years 1999–2001. Reference is made to GA–A22950, “The DIII-D Five-Year Program Plan,” which is a comprehensive discussion of research planned for DIII-D. We have also incorporated in Section 4 a slightly revised version of the “DIII-D 1999 Research Synopsis” which is posted on the General Atomics Website. That synopsis and other information on the Website contain the specifics of the 1999 Experimental Plan. This draft plan will be evolved until about May 1999 by the DIII-D Research Council with inputs from the DIII-D Advisory Committee and others.
